Assignment 4
BIOE 109 Evolution
Due date: Friday March 12 (IN LECTURE)

On a separate sheet of paper, respond to the following questions. Your responses should not take up more than ONE single spaced page total (or two double spaced pages).

1. Explain the three hypotheses that have been proposed to account for the evolution of virulence.

2. Define each of the six species concepts outlined in class and for each, give at least one drawback.

3. Explain the four major modes of speciation.
